

AMTRON® 4You 500

NEW

**SMART SOLAR CHARGING, APP AND
COMPANY CAR BILLING INCLUDED**

Our new AMTRON® 4You 500 charging station combines all the functions for a convenient charging experience at home.

Compatible with most leading energy management systems, it is particularly suitable for flexible, intelligent solar charging. In addition, the state-of-the-art charging station offers app operation, a coming home function including floor lighting and proximity sensor, secure access control via RFID card system and easy company car billing. The AMTRON® 4Installers commissioning app simplifies setting up the wallbox. The cover is easy to replace and there are 11 attractive cover colors to choose from.

Every single charging station is 100% climate-neutral and "Made in Germany".

All highlights at a glance

- ✓ PV-optimized charging via a compatible energy manager or manufacturer-independent via an external meter
- ✓ 1-phase and 3-phase solar charging (surplus charging) for dynamic charging capacities from 1.4 to 11 kW
- ✓ Operation via app or on the device itself
- ✓ Compatibility with most leading home energy management systems
- ✓ Export of charging statistics, e.g. for company car billing via app
- ✓ Access control via RFID
- ✓ Coming home function
- ✓ WIFI/LAN-connection
- ✓ Blackout protection that can be retrofitted
